

TECHNICAL DATA SHEET

PP Universal KPPL 0201

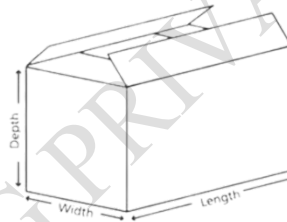

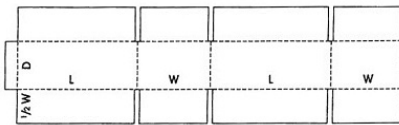

PP Universal Slotted type boxes is most versatile box in terms of usage, can be Manufactured in 1 or 2 and 4 joints by Heat Sealing, Top and Bottom flaps folded inward for forming the box, they are dispatched flat, ready to use and require closing by using Velcro's and handle provided for easy handling.

PP Universal Variants

There are standardized container styles according to an accepted FEFCO International Code which have been code numbered for easy Identification.

A. PP Universal KPPL 0201 comes in four variants: -

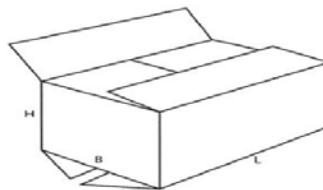

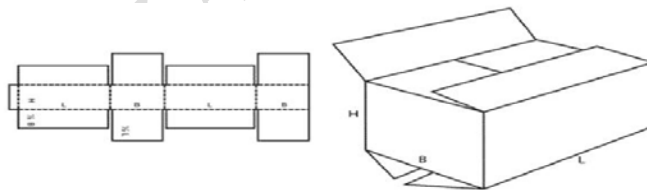

I. PP Universal Box: -

Consist of 4 walls with Top & Bottom flap is Half of the width

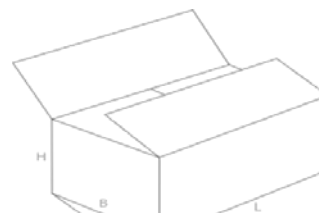

II. Central Meet Box:-

In this case, inner and outer flaps are cut to different lengths. This enables the inner flaps to meet in

the Centre. Thus creating no gaps when closed, give additional strength to the box, during handling and internal movement.

III. Overlapping Box:-

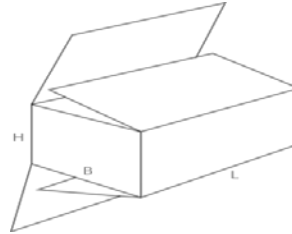

In this case, all the flaps are the same length. However, the outer flaps overlap by at least one 50 mm, minimum when folded, instead of meeting in the middle as with the pp universal box.

Date: / / 2021

this style substantially improves boxes integrity especially in those cases where the dimensions of length are significantly greater than the width.

IV. Full Overlapping Box:-

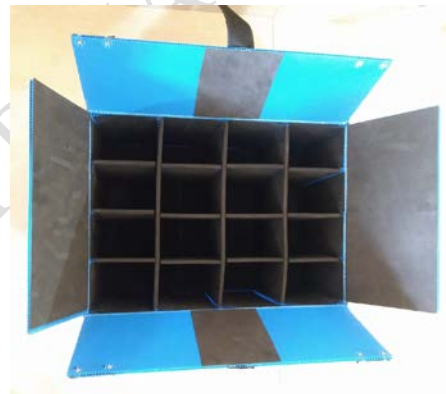

In this case All flaps with same depth/height and Outer flaps overlap each other completely in closed condition. More stable in bottom surface and Used for selected products.

C. PP Universal Specification: -

Specification & Description	Dimension			
	Minimum		Maximum	
Length	150mm		1500mm	
Width	150mm		1500mm	
Thickness	3mm		12mm	
GSM & Material type	450		2000	
Material	Polypropylene Fluted			
	Polypropylene Bubble guard			
	Polypropylene cross Flute			
Color	Blue, Green, Yellow, Pink, Black, Grey, Orange, Red			
Printing	Screen up to two color			
Other Option As per your Requirement		Velcro		EPE Foam
		“U” channel		PP Handle (Open Or Close) KPPL Design
		Black Belt Handel		Rivet
Inner Lamination		Crosslink		Non-Woven fabric
Inner Fitment		With Partition		With foam Buffer
Edge Sealing		Closed with HDPE Tape
